AI-Powered Emergency Medical Services

🤖

AI Diagnostics

Advanced symptom analysis and emergency guidance powered by machine learning.

📍

Hospital Locator

GPS-based feature to locate the nearest hospitals quickly.

🩹

First Aid Guide

Interactive step-by-step instructions for handling emergency medical situations.

MediRapid is built using modern web technologies:

HTML for structuring the web interface.

CSS (Tailwind CSS) for responsive and modern design.

JavaScript for dynamic functionality including animations and API integration.

Google Maps API for hospital location mapping and navigation.

1. Clone the repository:

```
git clone https://github.com/Ankit-CSE-01/MediRapid.git
```

2. Navigate to the project directory:

```
cd MediRapid
```

3. Set up a local server using tools like XAMPP or WAMP.

4. Run the application by navigating to `http://localhost/MediRapid` in your browser.

Find Nearest Hospitals: Click the "Find Hospitals" button to locate nearby hospitals using GPS.

AI Emergency Guide: Access the AI-powered chatbot for medical guidance based on symptoms.

First Aid Instructions: Get interactive guides for handling common medical emergencies.

Provide Feedback: Submit your feedback to help improve MediRapid services.
